

Logframe structure overview (2021)

Version 0.7

	Full Description	Summary
Goal	To enhance global health security and improve compliance with the IHR (2005) in selected countries and regions, in accordance with the expressed need.	
Outcome 1	Public health workforce and institutional technical capability strengthened in selected core IHR competencies, for improved prevention, detection and response to public health threats.	Technical capacity building
Output 1.1	Public health laboratories and laboratory networks strengthened, through improving diagnostic and biosafety/biosecurity capacities amongst laboratory personnel, and development of functional quality management systems, at national and sub-national levels.	Laboratory strengthening (diagnostic incl. lab-related AMR/Zoonotic, lab networks, QA, biosafety & biosecurity)
Output 1.2	Public health workforce epidemiology capability strengthened through targeted training, and support delivered to establish functional and inter-linked integrated disease surveillance & response systems at national and sub-national levels.	Epidemiology & disease surveillance
Output 1.3	Strategies and plans developed and implemented, Emergency Operations Centres (EOCs) established and functional, and staff trained for effective multi-hazard Emergency Preparedness, Resilience and Response (EPRR).	Emergency preparedness, resilience & response (EPRR plans/strategies & EOC function)
Output 1.4	Capacity to risk assess, detect and respond to Chemical Hazards improved within partner national public health institutions, through targeted support and/or training.	Chemical hazards
Output 1.5	Strengthened workforce capacity and systems at Points of Entry (PoE), for effective routine and public health emergency response function, linking public health and security authorities.	PoE workforce capacity
Outcome 2	Public health organisations established and functional in partner countries/regions, with institutional design and workforce planning developed, public health workforce developed, and leadership and management capabilities strengthened, for equitably improved IHR coordination and implementation.	Public health organisation, workforce and leadership development
Output 2.1	Co-development of public health organisational structure/design and workforce development strategic plans with partner organisations.	Institutional/organisational design & development (e.g. workforce gap analysis and development of Workforce Strategic Plans, Structures etc.)
Output 2.2	Co-development of the workforce with partner organisations, including support with establishment of HR management, retention and professional development mechanisms.	Development of the organisation's workforce (HR management, CPD etc. for improved HR retention & staff development)
Output 2.3	Workforce capability building and mentorship delivered in partner institutions, including leadership skills/capabilities development.	Workforce capability building (incl. PH leadership skills & mentoring support)
Output 2.4	Equity, sustainability and inclusion plan implemented to support public health organisational, leadership and workforce development.	Equity, sustainability, diversity & inclusion
Outcome 3	Resilient and sustainable public health systems and networks developed at sub-national, national and regional levels, through dedicated partnerships and support to improve IHR, multilateral and One Health coordination, for improved GHS/IHR compliance and population health.	Resilient & Sustainable PH systems
Output 3.1	Support provided for improved IHR coordination, communication and advocacy between relevant IHR stakeholders, including strengthened functioning of the IHR National Focal Point (NFP) in accordance with IHR (2005) roles and responsibilities.	IHR coordination, IHR NFP functionality
Output 3.2	Support improved multisectoral coordination and One Health (OH) approaches, through co-development and establishment of coordination mechanisms/forums, advocacy and support for the implementation of OH plans and targeted training, at national and regional levels.	Multisectoral coordination & OH approaches
Output 3.3	Strengthened bilateral partner relationships, promoting demand-led and sustainable technical capacity building & public health system strengthening.	Strengthened bilateral partnerships to support demand-led capacity building
Output 3.4	Support for improved multilateral collaboration and co-development of public health networks with WHO, IANPHI, and other external national and regional stakeholders.	Improved multilateral coordination & PH networks
Output 3.5	Support for the establishment of functional regional public health systems/networks and enhanced coordination/linkages between national and regional levels.	Functional regional public health system/coordination
Output 3.6	Facilitation and enablement of two-way sharing and dissemination of learning & knowledge, and contribution to the evidence base for effective IHR/GHS capacity building and broader impact - within the IHR Project and partner organisations.	Multi-way learning & knowledge sharing & dissemination
Output 3.7	Cross-HMG collaboration promoted and enhanced to align resources/expertise and promote greater impact, including provision of strategic input and public health technical support to HMG partners in-country and in the UK.	Cross-HMG collaboration, strategic input & support
